

## **BROCHURE FRONT COVER:**

Black line denotes  
where the two panels  
of the front cover fold  
together to create the  
appearance of  
"opening doors."

# BROCHURE BACK PANEL:

Designing the brochure in this non-traditional, “open doors” manner allowed for the back panel to hold the large table that had to fit in the brochure without it looking out of place.

The final 2 pages show the brochure in its printed stage, before folding.

## *What is the Utah Admissions Index?*

An Admissions Index score is required at Southern Utah University, University of Utah, and Utah State University. It is also used at many other schools for scholarships and placement.

PLANNING TO  
AND CARE

TO THE FUTURE

OPENING DOORS

## PARENTS: Did you Know?

- Most students make the decision to go to college in the 7th or 8th grade.
- They'll earn over 32% or more on average each year with a Bachelor's Degree than someone with only a high school diploma.
- That's more than \$1 million over their lifetime
- Those with a Bachelor's Degree are less likely to be unemployed.
- They'll make more money with any type of additional training beyond high school.
- Studies prove it: Education after high school means your student is likely to make more money than people who stop at high school.

## UtahFutures.org

UtahFutures.org is a comprehensive education-to-workforce online solution that students use at school to search schools, scholarships and occupations as well as access prep materials for the SAT, ACT, and AP tests. All Utah students maintain their Student Education Occupation Plan (SEOP) on UtahFutures.org – a one stop resource for post-high school educational and work opportunities!

## Which Classes Should I Take?

### 7th-8th Grade

Be sure to take challenging classes and get good grades. The following classes are recommended during your middle school years to help you prepare for high school:

- 2 years of Language Arts
- 2 years of Math
- 1.5 years of Science
- 1.5 years of Social Studies
- 1 year of Art
- 1.5 years of Physical Education
- 1 year of Health
- 0.5 year of Career & Tech Education

In addition to taking these classes, you can prepare for college by reading at least 30 minutes beyond homework. Also, if you find yourself struggling in classes, ask for help from your teachers. They want you to succeed!

### 9th-12th Grade

It might seem like a long way away, but the classes you choose in high school can impact how successful you are in college.

The following classes are recommended in grades 9-12:

- Four years of English: Courses that emphasize expository and analytic writing skills and grammar are recommended.
- Four years of Math: Proficiency in Algebra, Geometry, and Algebra II. For those students planning to pursue majors in science, technology, math, and engineering, pre-calculus or calculus is strongly encouraged.
- Three years of Science: Courses should include Physical Science, Biology, Chemistry, or Physics. Lab experiences are preferable.
- Three years of Social Studies: Courses should include U.S. History, World History, Geography, Economics, and Government to build cultural and global awareness.
- Directive Coursework: Should include at least one and a half credits of Fine Arts and one credit of CTE. Foreign Language is encouraged.
- Coursework through your Senior Year: Meaningful course work in the senior year, especially in English, math, and science, is essential in helping students perform successfully in the first year of college.

Keeping a 3.0 grade point average in these classes can really help too. You can also ask your counselor about CTE courses, concurrent enrollment, AP and IB courses, to help make transitioning to college even easier.

## PAYING FOR COLLEGE

College is an investment that pays off. It is preparation for a career. The long-term benefits of a college education drastically outweigh the cost of initially going.

Don't assume you can't afford to go to college. There are many financial aid resources available to help you pay for it. This assistance is generally in one of the following four types of financial aid:

**GRANTS:** Federal/state money given to those who qualify based upon financial need

**SCHOLARSHIPS:** Money given for education no need for repayment

**WORK STUDY:** Money given to a qualified individual in exchange for work

**LOANS:** Money loaned at a favorable rate, but must be repaid.

If you want to get a head start on the financial aid process, you can use the FAFSA 4Caster to see how much federal aid you might qualify for.
